### Habasit – Solutions in motion

# Pre-heater Spiral Belt

### **ENR-15EGW**

The ENR-15EGW is specifically designed to meet the requirements of a pre-heater spiral, top belt in processing lines for OSB, particle boards, or MDF wood panels. Increasing the temperature of the wood-resin mixture before it reaches the press enables faster curing and increased speed of the production line, which in turn results in increased productivity of 15% to 30%.

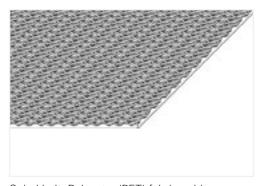

Habasit's ENR-15EGW is the ideal processing belt for this application, offering:

- Constant airflow over the joint thanks to its endless woven structure and single-loop seam joint
- No shrinking effect in the hot environment due to the additional heat-treatment process
- No wood fiber clogging issues which allows reliable air permeability
- Long lifetime due to its robust and durable belt design offering high abrasion and hydrolysis resistance
- Fast installation of the single-loop joint without dismantling the whole prepress, which limits downtimes and yield losses for end users

## Pre-heater Spiral Belt ENR-15EGW

Key features	Your benefits
High temperature stability	<ul> <li>High operating temperatures:</li> <li>130 °C continuous,</li> <li>150 °C short-term peak temperature</li> <li>Fast curing and increased productivity</li> </ul>
Hydrolysis resistance	Suitable for steam treatment
Single-loop seam joining	<ul><li>Fast installation</li><li>Constant airflow over the complete belt length</li></ul>
No clogging of wood fibers	<ul><li>Long lifetime</li><li>Constant airflow throughout belt life</li></ul>
Anti-static properties	<ul><li>Safe running of the production line</li><li>Good release properties</li></ul>

#### **Cross-section**

Spiral belt: Polyester (PET) fabric, white

#### Technical key data

Thickness		Mass				Tensile force k1% relaxed		Max. operating temperature	
mm	inch	kg/m2	lb/sqft	N/mm	lbf/in	N/mm	lbf/in	°C	°F
2.4	0.09	1.1	0.225	19	108	16	91	130	266
