HabiPLAST™

Beyond its leadership in production and sales of conveyor belts, Habasit has been developing along the years a comprehensive range of plastic accessories for conveyors, which has been identified by the HabiPLAST™ trade mark. Most of these products are strictly in contact with the conveyor belt, so they represent an essential part of the recognized success of the Habasit solutions: profiles, guides for plastic modular belts and chains, sprockets, guides for goods, other plastic parts, etc.

Industries and applications

HabiPLAST™ products are used in many industries and are the best complement for HabasitLINK® modular belts, HabaCHAIN® slat and conveyor chains, and HabaSYNC® timing belts.

Chemistry

Production

For the development of the Habiplast™ product range, Habasit has built a comprehensive knowledge in plastic processing: RAM extrusion, screw extrusion, machining and, of course, molding. Our Producing Units are equipped with the most technologically advanced machines and equipment. Extrusion and CNC machines guarantee a remarkable flexibility and big productive volumes always of high quality. Our stock of standard products ensures deliveries on time. In addition to the standard products which are available in the catalogue, several plastic parts are also machined on customers' drawings.

Competence and experience

Habasit application engineers and technicians are at your disposal to provide professional consulting and technical support.

With more than 70 years of experience and a comprehensive global network, Habasit is able to respond to any request and to satisfy specific needs with an optimal tailored solution.

Habasit standard engineering polymers

Habasit offers a wide range of materials in order to satisfy all customers' needs.

Polyethylene is the most widely used engineering plastic material for belting profiles.

HabiPLAST™ polyethylene

HabiPLAST™ offers a wide range of high density polyethylene obtained by a low pressure polymerization process. The average molecular weight is between 0.3 and 8 millions of g/mol (measured by a viscometer). Ultra High Molecular Weight (UHMW-PE) identifies the polyethylene with more than 1 million of g/mol.

As the molecular weight of PE increases, so do its mechanical properties, including wear and impact resistance, tensile strength at a high temperatures, and energy absorption.

Additives such as fillers or lubricants can be used to further improve several technical properties, depending on the specific application requirements.

TriboPLUS®

TriboPlus® represents a new generation of polyethylene with the highest performances in terms of low friction coefficient and high wear resistance.

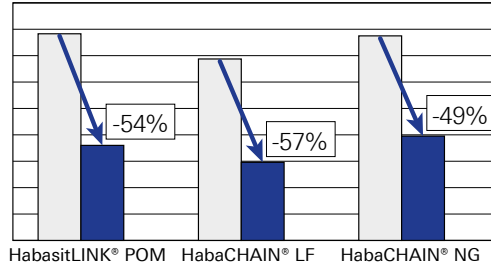

Compared to the standard UHMW polyethylene (PE40), laboratory tests showed the following properties of TriboPlus® (TP40):

Product properties	Your benefit
Lower friction	Energy savings
Less noise	Improved working conditions
Higher wear resistance	Less dusting – More Hygiene
Higher speed and load limits	Higher productivity
Self-lubrication	Less maintenance
Longer life	Lower operational costs

Convincing results for higher productivity and energy savings

LOWER FRICTION

The TriboPlus® formulation is particularly suitable for the production of profiles for belts and chain but also for straight, and corner tracks, which are often subject to high friction, and wear.

In addition to the standard version, the TriboPlus® profiles can be provided with the special ESD (Electro Static Discharge) Polyethylene. TriboPlus® is compliant to the EU 10/2011 and FDA food regulations.

LOWER WEAR RATE

INCREASED LOAD LIMIT FOR POM

PE UHMW HabiPLAST TriboPlus®

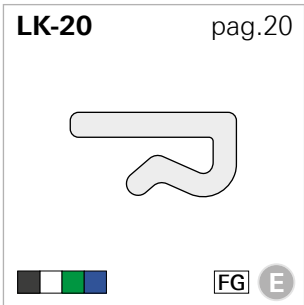

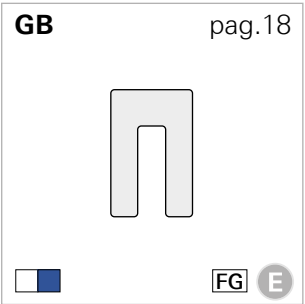

Other engineering plastic materials

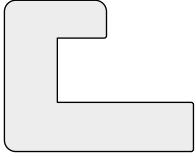

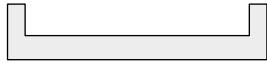

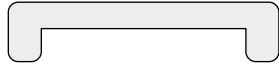

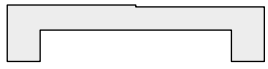

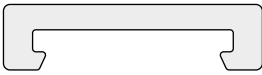

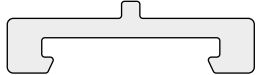

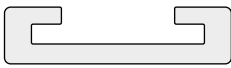

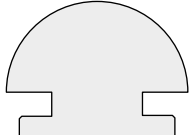

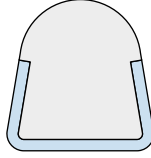

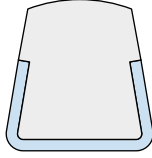

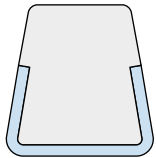

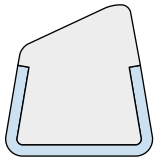

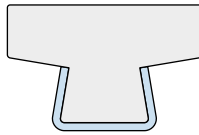

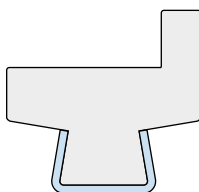

While extruded profiles are only made of polyethylene, there is a consistent part of the HabiPLAST™ product range which is manufactured using different engineering plastic materials (PA, POM, PET...).

HabiPLAST™ Food approved materials strictly comply to the EU and FDA regulations. Food certifications are available on the www.habasit.com web site.

Wear strips and guides for plastic modular belts, chains and goods

HabiPLAST™ profiles represent the best solution not only to support and guide HabasitLINK plastic modular belts, HabaCHAIN plastic and metal chains, but also to guide goods along the conveyor.

The wide range of standard extruded profiles allows to find a suitable and “easy to assemble” solution for the most common conveyor structures. Customized machined profiles are also available for any special application.

The HabiPLAST wear strips and guides for plastic modular belts, chains and goods are mainly produced in ultra-high molecular weight polyethylene.

The most relevant features are:

- Low friction
- Wear resistance
- Low noise
- Good impact resistance
- High chemical resistance
- Corrosion resistance
- Food compliancy

Our UHMW PE40 is the mostly used techno polymer for standard applications.

Whenever very low friction and high wear resistance are required, all the HabiPLAST™ profiles can be manufactured in TriboPlus, the special lubricated Polyethylene with outstanding tribological properties, developed by Habasit (see catalogue introduction for further information).

For low demanding applications, the HabiPLAST™ product range also includes a cost effective regenerated PE10.

In addition to the extruded and machined profiles, Habiplast™ offers a complete range of corner and straight tracks, designed for the use with both plastic and metal chains.

Tab and Bevel tracks

For several years, Tab and Bevel tracks have been the most common solution to guide chains along the curved section of conveyors.

They still represent the most cost effective solution where the frequent conveyor cleaning and the stability of the product conveyed are not considered a top priority.

Tab and Bevel tracks are normally provided in UHMW Polyethylene. Other materials are available on request.

Magnetic Tracks

HabiPLAST™ magnetic corner tracks have been developed to allow easy and quick removal of the conveyor chain for frequent cleaning operations. At the same time, the tracks optimize chain retention along the curve.

The chain is held down by the force of magnetic poles. The number and position of the poles along the track are designed to maximize chain retention while minimizing the energy consumption required to move the chain.

HabiPLAST magnetic corner tracks are suitable for use with both plastic and metal chains.

The recommended material combination for magnetic tracks is:

- TriboPlus cobalt blue TP40C for the carry lane
 - UHMW black polyethylene PE10B for the return lane
- TriboPlus is a new generation of specially lubricated polyethylene with outstanding tribological properties.

Compared to the standard high density polyethylene (UHMW-PE), laboratory tests have shown the following properties:

- Reduction of friction and power consumption of around 50%
- Almost total absence of wear
- Much higher load limit

Other materials are available on request.

Product properties	Your benefit
Lower friction	Energy savings
Less noise	Improved working conditions
Higher wear resistance	Less dusting and consequent higher level of hygiene
Higher speed and load limits	Higher productivity
Self-lubrication	Less maintenance
Longer life	Lower operational costs

Type	Advantages	Disadvantages
<ul style="list-style-type: none"> • Tab 	<ul style="list-style-type: none"> • Good holding retention • One piece return track 	<ul style="list-style-type: none"> • Chain edge will lift • Chain can not be removed from track • More noisy
<ul style="list-style-type: none"> • Bevel 	<ul style="list-style-type: none"> • Chain flat through Curve • Chain can be removed from straight section 	<ul style="list-style-type: none"> • Two pieces return track • Lack of mechanical retention
<ul style="list-style-type: none"> • Magnetic 	<ul style="list-style-type: none"> • Chain flat through Curve • Chain can be removed from straight and curve section 	<ul style="list-style-type: none"> • Thick return track • Lack of mechanical retention • More expensive

Installation

HabiPLAST™ magnetic tracks are supplied not assembled together with stainless steel assembly screws.

On request they can be provided with side holes or threaded inserts.

Accessories

Magnetic tracks are often used in combination with return guide shoes, that help the alignment of the chain to the return cavities of the tracks.

Chain tracks

Magnetic Corner Tracks C0880 series

Chain Types: C0880M, C0881M.

Chain width: 3.25"/3.30", 4.50". (7.50" available on request).

Radii: 500 mm, 610 mm (24"). Centerline 1st lane

Angle: 30°, 45°, 60°, 90°

Standard materials:

T - TP40-C (Blue), carry track,

R - PE10-B (Black), carry + return track.

Standard lanes: 1 to 3. Lanes from 4 to 8 available on request.

Supplied as: Single track. For carry + return, order (A) + (B).

Part (A): Carry track, provided with assembled magnets.

Part (B): Return track, provided with stainless steel assembly screws.

Accessories on request: return shoes (see data sheet) and inserts.

Special configurations on request: tangents, special radii, special angles, mounting options. Other materials: PE40-W (Nat White), PA6C-D+LF (Grey).

Application example

Complete the product code by substituting ## with the chosen angle

Ex.: TE16DTM-90-1T-00 (90° corner track in TP40-C material).

Chain tracks

Magnetic Corner Tracks C1061 series

Chain Types: C1061M.

Chain width: 3.30".

Radii: 500 mm, 610 mm (24"). Centerline 1st lane.

Angle: 30°, 45°, 60°, 90°

Standard materials:

T - TP40-C (Blue), carry track,

R - PE10-B (Black), carry + return track.

Standard Lanes: 1 to 3. Lanes from 4 to 8 available on request.

Supplied as: Single track. For carry + return, order (A) + (B).

Part (A): Carry track, provided with assembled magnets.

Part (B): Return track, provided with stainless steel assembly screws.

Accessories on request: return shoes (see data sheet) and inserts.

Special configurations on request: tangents, special radii, special angles, mounting options. Other materials:

PE40-W (Nat White), PA6E-D+LF (Grey).

Application example

Data

Chain width	Lanes	Width W	Thickness T	Part	Radius 500 mm		Radius 610 mm (24")

Ex.: SG230TT200-1**U**-00 (straight track in PE40-W).

Chain tracks

Bevel Corner Tracks C0880 series

Chain Types: C0880B,C0879B,C1071B, C0881B & C8811B.

Chain width: 3.25"/3.30",4.50",7.50".

Angle: 90°. Other angles on request.

Standard materials:

T - TP40-C (Blue) chain track,

R - PE10-B (Black) chain track + support plate.

Other materials on request: PE40-W(Nat White),

PE05-B(Black), PA6C-D+LF (Grey).

Lanes: 1, 2, 3. Additional lanes on request.

Supplied as: Single track. Part (A): Chain track, Part (B): Support plate.

For carry + return, order 2 x (A) and 1 x (B).

Data

Chain tracks

Bevel Straight Tracks C0880 series

Chain Types: C0880B,C0879B,C1071B, C0881B & C8811B.

Also compatible with C0820, C0828, C0831.

Chain width: 3.25"/3.30",4.50",7.50".

Standard materials:

U - PE40-W (Nat White),

R - PE10-B (Black).

Other materials on request: TP40-C (Blue), PE05-B(Black).

Lanes: 1, Additional lanes on request.

Supplied as: Single lane. Part (A): chain track, Part (B): support plate

For carry + return, order 2 x (A) and 1 x (B).

Application example

Complete the product code by substituting # with the chosen material code

Ex.: SE160TB200-1**U**-00 (corner track in PE40-W).

Chain tracks

Bevel Corner Tracks C0882 series

Chain Types: C0882B.

Chain width: 4.50", 7.50", 10".

Angle: 90°. Other angles on request.

Standard materials:

T - TP40-C (Blue) chain track,

R - PE10-B (Black) chain track + support plate.

Other materials on request: PE40-W (Nat White),

PE05-B (Black), PA6C-D+LF (Grey).

Lanes: 1, 2, 3. Additional lanes on request.

Supplied as: Single track. Part (A): Chain track; Part (B): Support plate;

For carry + return, order 2 x (A) and 1 x (B), exception see (*).

Guides for timing belts

HabaSYNC® timing belts support conveying and linear movement applications where optimum performance requires precise product placement and component positioning. High-quality materials coupled with our state-of-the-art manufacturing process and years of experience ensure innovative solutions tailored to your needs. HabiPLAST™ timing belt support guides are designed to allow timing belts to run smoothly across a low-friction surface.

Our guides are manufactured in Ultra High Molecular Weight Polyethylene, which offers the following advantages:

- high chemical resistance
- corrosion resistance
- wear resistance
- low noise.

The product range fits standard HabaSYNC® belt widths and can be supplied with or without metallic profiles.

Guides for round belts, V-belts and roller chains

HabiPLAST™ profiles are the best solution for improving performances and reducing maintenance of V-belts, round belts, and roller chains.

- Excellent sliding of the chain/belt
- Great wear resistance
- Low coefficient of friction (less drive energy required)
- Low noise
- Good resistance to impacts also at low temperature
- High chemical resistance
- Easy and quick assembly
- Corrosion resistance

The standard material for guide profiles is HabiPLAST™ PE10 UHMW Polyethylene, green color. Other materials are available on request. Habasit offers a full range of standard guides and can produce any kind of profile according to customer's specifications.

Condensed Material features	Extended material features	Old name	Habasisit material name (DoC)	Color	Sheets FOOD compliancy	Round Bars availability	Round Bars FOOD compliancy
PE Polyethylene HabiPLAST™							
High density PE (~300.000 molecular weight)	PEHD with a molecular weight in the range of 300'000 g/mol. Good performance with HabasisitLINK and HabaCHAIN materials in low demanding applications. Excellent chemical resistance. White and green limited resistance against UV light.	HabiPLAST HE/M	HabiPLAST-PE03-natwh	white 		X	
			HabiPLAST-PE03-black	black 		X	
			HabiPLAST-PE03-green	green 		X	
High density PE (~500.000 molecular weight)	PEHMW with a molecular weight in the range of 500'000 g/mol. Good performance with HabasisitLINK and HabaCHAIN materials. Excellent chemical resistance. Limited resistance against UV light.	HabiPLAST H/SA	HabiPLAST-PE05-natwh+FG	white 	YES		
			HabiPLAST-PE05-blue+FG	blue 	YES		
High density PE (~500.000 molecular weight), recycled	Recycled PEHMW with a molecular weight in the range of 500'000 g/mol. Should not be used for sliding applications with HabasisitLINK and HabaCHAIN materials.		HabiPLAST-PE05-black+RC	black 			
Ultra high molecular weight PE (~1.000.000), recycled, antistatic	Recycled PEUHMW with a molecular weight in the range of 1'000'000 g/mol and antistatic properties. Good performance with HabasisitLINK and HabaCHAIN materials.	HabiPLAST UHR/S	HabiPLAST-PE10-black+AR	black 		X	
Ultra high molecular weight PE (~1.000.000), recycled	Recycled PEUHMW with a molecular weight in the range of 1'000'000 g/mol. Good performance with HabasisitLINK and HabaCHAIN materials.	HabiPLAST UHR/S	HabiPLAST-PE10-green+RC	green 			
Ultra high molecular weight PE (min 4.000.000)	PEUHMW with a molecular weight higher than 4'000'000 g/mol. Sintered materials with good wear and friction properties. Suitable for high demanding applications. Good performance with HabasisitLINK and HabaCHAIN materials. Excellent chemical resistance. White and green limited resistance against UV light.	HabiPLAST UHV/S	HabiPLAST-PE40-black	black 			
			HabiPLAST-PE40-green	green 			
			HabiPLAST-PE40-natwh+FG	white 	YES	X	YES
Ultra high molecular weight PE (min 4.000.000), electroconductive	PEUHMW with a molecular weight higher than 4'000'000 g/mol. Conductive material with low friction values on conductive HabasisitLINK and HabaCHAIN materials.	HabiPLAST UHV/S-B NERA EL	HabiPLAST-PE40-black+EC	black 			
Ultra high molecular weight PE (min 4.000.000), with Molybdenum disulphide	PEUHMW with a molecular weight higher than 4'000'000 g/mol. Molybdenum filled material with good wear resistance against steel in wet and dry environment.	HabiPLAST UHV/S MOS2	HabiPLAST-PE40-black+MO	black 			
Ultra high molecular weight PE (min 8.000.000), low friction	PEUHMW with a molecular weight higher than 8'000'000 g/mol. Sintered materials with excellent wear resistance. Modified to have very low friction against steel. Excellent chemical resistance. Limited resistance against UV light.	HabiPLAST UHV/S S.PLUS	HabiPLAST-PE80-coblu+LF	coblu 			
Ultra high molecular weight PE (min 8.000.000), with glass balls	PEUHMW with a molecular weight higher than 8'000'000 g/mol. Glass balls reinforcement. Mainly used for high speed PET bottling guides.	HabiPLAST UHV/S PT	HabiPLAST-PE80-black+GB	black 			

Condensed Material features	Extended material features	Old name	Habasisit material name (DoC)	Color	Sheets FOOD compliance	Round Bars availability	Round Bars FOOD compliance
PE Polyethylene HabiPLAST™							
Ultra high molecular weight PE (min 8.000.000), electroconductive	PEUHMW with a molecular weight higher than 8'000'000 g/mol. For demanding applications where a low conductivity is needed.	HabiPLAST UHV/S PLUS-EL	HabiPLAST-PE80-black+EC	black 			
TP Polyethylene special Habasisit formulation TriboPlus®							
Ultra high molecular weight PE, low friction, low wear	Modified PEUHMW with very low friction and lowest wear rate with HabasisitLINK and HabaCHAIN materials in not abrasive applications.	TriboPlus	TriboPlus-TP40-coblue+FG	coblue 	YES		
Ultra high molecular weight PE, low friction, low wear, electroconductive	Modified PEUHMW with very low friction and lowest wear rate with HabasisitLINK and HabaCHAIN materials in not abrasive applications. With conductive properties.	TriboPlus FE	TriboPlus-TP40-black+FE	black 	YES		
PA Polyamide Habilon							
Extruded PA6	Extruded PA6 . Mainly used for machined parts like sprockets.	Habilon PA6/E	Habilon-PA6E-natwh	white 		X	
Cast PA6	Cast PA6 . Mainly used for machined parts like sprockets.	Habilon PA6/C	Habilon-PA6C-natwh	white 			
Cast PA6 heat stabilized	Modified cast PA6 , resistant to higher temperatures (Max 120 °C).	Habilon PA6 STABCAL	Habilon-PA6C-black+ET	black 		X	
Cast PA6, with Molybdenum disulphide	Molybdenum filled cast PA6 with good wear resistance against steel in dry environment.	Habilon PA6/C-MOS2	Habilon-PA6C-black+MO	black 			
Cast PA6, self-lubricating	Modified cast PA6 with very low friction and lowest wear rate with HabasisitLINK and HabaCHAIN materials in demanding applications.		Habilon-PA6C-gray+LF	gray 			
PA66, + 30% glass fibre	Glassfiber reinforced PA66 with high stiffness, high strength and high temperature resistance.	Habilon PA66/E-GF30	Habilon-PA66-black+G5	black 			
PET Polyethylene terephthalate Habipet							
PET	Very hard thermoplastic material, good performance with HabasisitLINK and HabaCHAIN materials in abrasive and wet applications.	Habipet PET	Habipet-PET-black	black 			
			Habipet-PET-natwh+FG	white 	YES	X	YES
PET low friction	Modified PET with very low friction and lowest wear rate. Very hard thermoplastic material, good performance with HabasisitLINK and HabaCHAIN materials in abrasive and wet applications.	Habipet PET CLS	Habipet-PET-gray+LF	gray 			
POM Polyoxymethylene Habital							
POM	Hard thermoplastic material for machined parts like sprockets. Squeaking in combination with POM belts	Habital POM	Habital-POM-black	black 			
			Habital-POM-natwh+FG	white 	YES	X	YES
			Habital-POM-coblue+FG	coblue 	YES		

Condensed Material features	Extended material features	Old name	Habasisit material name (DoC)	Color	Sheets FOOD compliance	Round Bars availability	Round Bars FOOD compliance
PP Polypropylene Habilene							
PP	Good hot water and chemical resistance.	Habilene PP	Habilene-PP-natwh	white <input type="checkbox"/>			
PTFE Polytetrafluorethylene Habiflour							
PTFE	Extreme good chemical resistance, none sticking properties.	Habiflour PTFE	Habiflour-PTFE-natwh+FG	white <input type="checkbox"/>	YES	X	YES
PTFE 25% glass fibre	Reinforced material with very good chemical resistance, none sticking properties, slightly improved wear resistance versus unfilled material.	HABIFLUOR PTFE+GF25	Habiflour-PTFE-natwh+G4	white <input type="checkbox"/>			
PVC Polyvinylchloride Habivit							
PVC	Good chemical resistance.	Habivit PVC/E	Habivit-PVC-natwh	white <input type="checkbox"/>		X	
			Habivit-PVC-gray	gray <input type="checkbox"/>		X	
			Habivit-PVC-black	black <input type="checkbox"/>

¹measured on a test conveyor with 1500 kg/m² load, speed range 5 – 15 m/min, test distance 800 km

²measured on a pin on disk test, total wear rate of pin and disk together

³measured on a pin on disk test during wear test

Wear rate

A++ = Best performance

A+ = Good Performance

A = Standard combination

B = Acceptable but not recommended

C = Bad solution - do not use

Customers first

Your success is our goal. This why we don't just offer products, we provide solutions. As committed partners to our customers, we are dedicated to sharing our knowledge and delivering full support.

Since our foundation in 1946, Habasit has been finding ways to meet each customer's specific needs in every application. This is what differentiates us as the No. 1 worldwide belting provider in the industry today.

Comprehensive consulting and technical support

Profit from the best consulting and technical support in the lightweight belting industry. Local experts are always available to assist you with your belting needs. The Habasit team is proud to provide the highest level of support, together with top-quality products that have led the global market for decades.

Belt selection and calculation assistance

We are always glad to help you select the most suitable belt for any application. We now also provide the free online tool 'SeleCalc' that makes it easy to make selections and calculations yourself. Simply register online at selecalc.habasit.com.

Fabrication, assembly and local installation services

As a full-service belting provider, we offer joining and assembly services either at our own locations or directly on your equipment.

Habasit has over 30 affiliates worldwide, each with its own inventory, fabrication, assembly and service facilities.

Together with representative offices and numerous qualified distributors, we can react quickly and efficiently to meet all your needs.

Customer training programs

To ensure the optimal performance and maximum lifespan of all our products, we offer training programs and various support tools. These include procedures for fabrication, installation, assembly, maintenance and belt repair, all of which take place at a Habasit site or at your location.

Belt monitoring, inspections, analyses and process optimization proposals

We organize and handle belt maintenance, inspections, analyses and surveys at customer sites. Upon request, we are ready to develop optimization proposals to ensure you're getting maximum value from your machinery and process output.

Design assistance for customized solutions

Habasit believes in building partnerships with our customers. Our engineering team will work closely with your engineers on joint design developments from initial design to final implementation. This expert service can be invaluable for projects involving new technologies or large-scale modifications and adaptations.

This **disclaimer** is made by and on behalf of Habasisit and its affiliated companies, directors, employees, agents and contractors (hereinafter collectively "HABASIT") with respect to the products referred to herein (the "Products").

SAFETY WARNINGS SHOULD BE READ CAREFULLY AND ANY RECOMMENDED SAFETY PRECAUTIONS BE FOLLOWED STRICTLY! Please refer to the Safety Warnings herein, in the Habasisit catalogue as well as installation and operating manuals.

All indications / information as to the application, use and performance of the Products are recommendations provided with due diligence and care, but no representations or warranties of any kind are made as to their completeness, accuracy or suitability for a particular purpose. The data provided herein are based on laboratory application with small-scale test equipment, running at standard conditions, and do not necessarily match product performance in industrial use. New knowledge and experience may lead to re-assessments and modifications within a short period of time and without prior notice.

EXCEPT AS EXPLICITLY WARRANTED BY HABASIT, WHICH WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, THE PRODUCTS ARE PROVIDED "AS IS". HABASIT DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE, ALL OF WHICH ARE HEREBY EXCLUDED TO THE EXTENT ALLOWED BY APPLICABLE LAW. BECAUSE CONDITIONS OF USE IN INDUSTRIAL APPLICATION ARE OUTSIDE OF HABASIT'S CONTROL, HABASIT DOES NOT ASSUME ANY LIABILITY CONCERNING THE SUITABILITY AND PROCESS ABILITY OF THE PRODUCTS, INCLUDING INDICATIONS ON PROCESS RESULTS AND OUTPUT.
