

# Habaclip™ Sidewall Joining Clip

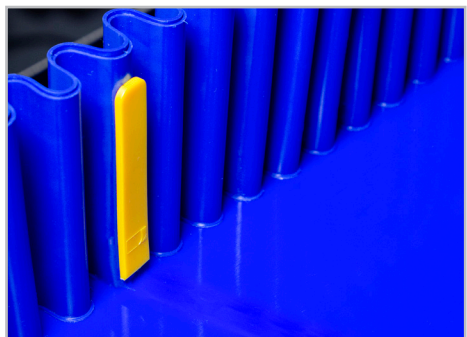

Hygienic solution for Habasit® Cleandrive belts

Sidewalls are essential for preventing conveyed products from spilling over the edges of Habasit Cleandrive belts. Unfortunately, the sidewalls' effectiveness is often limited at the belt splice, where they may be missing or overlapped and secured with unhygienic zip ties or bolts. This can result in products escaping the belt or becoming trapped in the overlapped sidewalls.

Fortunately, the Habaclip<sup>•</sup> from Habasit offers a simple yet effective solution. By mechanically joining the two sidewall ends at the belt splice, the Habaclip conforms perfectly to the Habasit Cleandrive sidewalls, creating a secure barrier that prevents product loss. Best of all, the Habaclip is FDA and EU compliant and can be easily removed for cleaning. Plus, it works seamlessly with both welded and mechanically laced belts.

# Habaclip™ Sidewall Joining Clip

## Upgrade Your Habasit Cleandrive Belt

The Habaclip can be ordered together with the belt or as a standalone item. When ordered with the belt, the sidewalls are pre-punched with holes for both mechanically laced and welded belts. The Habaclip comes pre-installed on laced belts, but on-site installation is required for welded belts.

## Habaclip for Mechanically Laced Habasit Cleandrive

Step 1.  
Join the belt ends and place the Habaclip into the pre-made indentation in the lace.

Step 2.  
Insert the rod into the lace and through the Habaclip. Secure the rod into place.

Step 3.  
Insert the Habaclip nubs into the holes in the sidewalls.  
**Installation complete.**

Key Features	Customer Benefits
Installs without special tools	Can be installed and removed by anyone. Ideal when the belt needs to be removed for cleaning or maintenance.
Hygienic design with hydrolysis resistance	Can be uninstalled and cleaned easily and withstands the demanding industry cleaning and sanitation protocols
Durable and flexible single-piece molded design	Habaclip will not break off and will provide a tight barrier against product escape or trapping improving product throughput
FDA and EU compliant	Meets FDA and EU food conformity requirements
Metal detectible	Reduces the risk of product contamination
Compatible with Saniclip for laced Habasit Cleandrive belts (but does not require Saniclip)	The benefits of both Saniclip and Habaclip can be realized simultaneously
